

The Shea

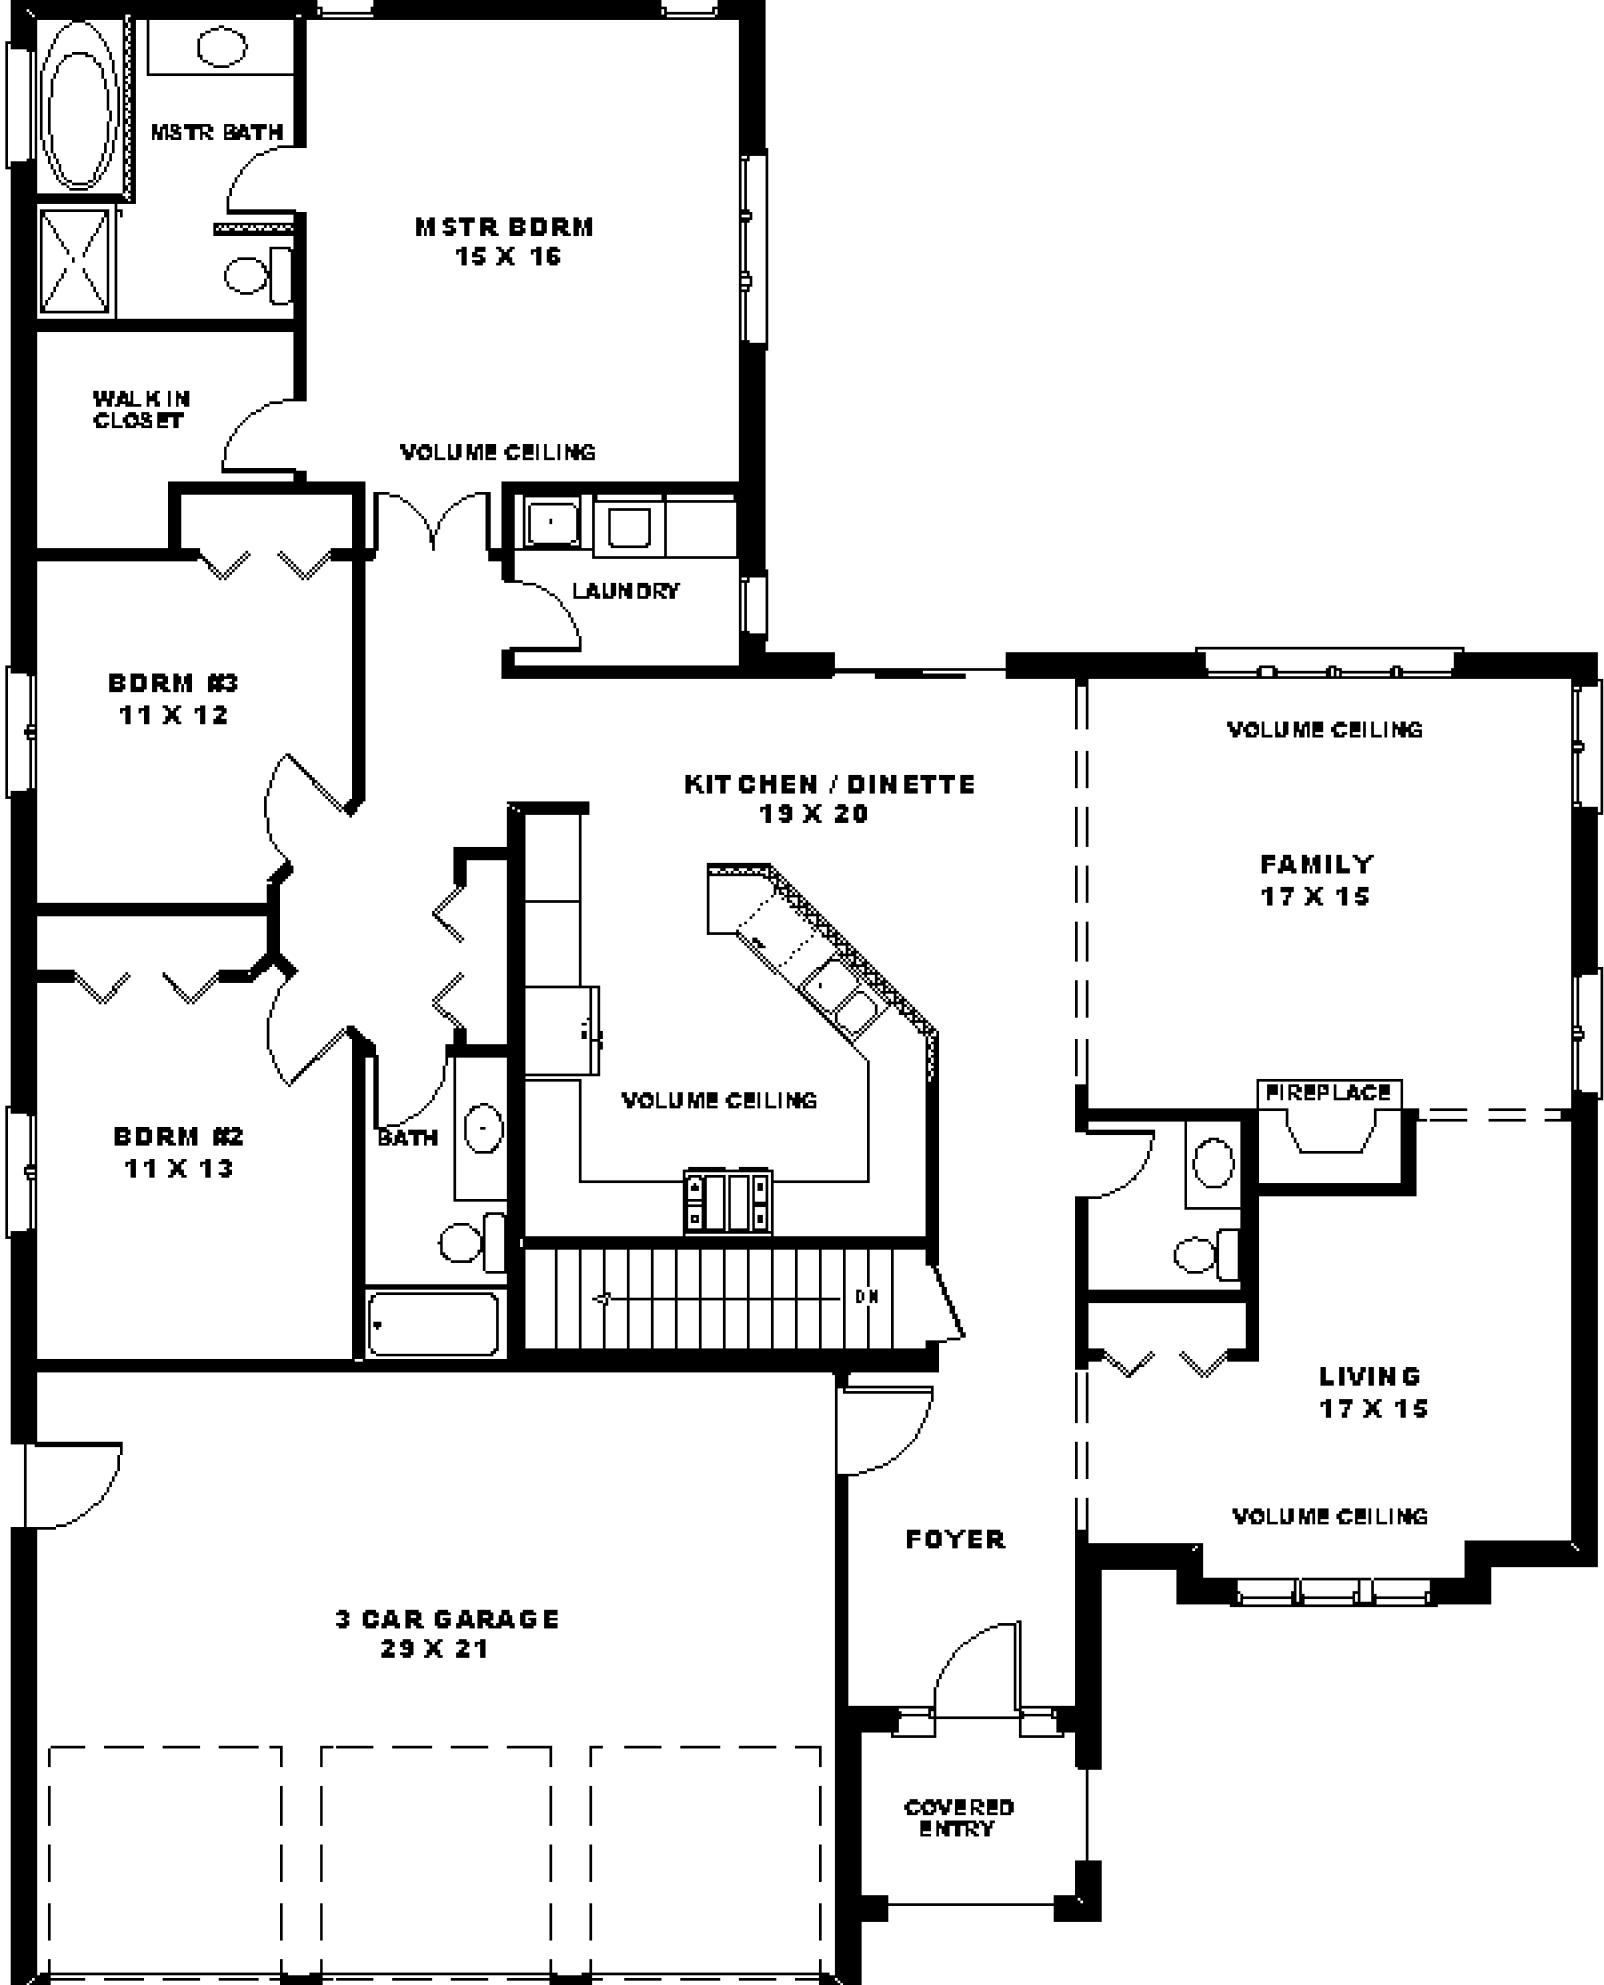

The Shea: 2,200 sq. ft.

This quaint ranch home with an open floor plan is single-level living at its finest. The volume ceilings showcased throughout the home provide a heightened sense of luxury and comfort. The gourmet kitchen is the heart and soul of the home- offering families the perfect place to reconnect after a long day.

Flaherty's policy of continual improvement in architectural design and construction considerations requires that the dimensions shown are subject to minor variations. The renderings are an artist's conception and the actual homes may be modified in construction to suit interior, exterior and site considerations. Illustrations may not reflect current exterior features. Please refer to plans and specifications in the sales office for current details. Prices are subject to change without notice.
